- 3) 1995-1996. Pacific Cultural Foundation, Taiwan: research grant used to facilitate publication of the *Thao-English dictionary*. \$5,000.

## **Prizes and honors**

- 1) First prize, poetry division, National High School Scholastic Writing Awards, 1958 (115,000 entrants from the USA and Canada, five first prizes)
- Chosen for postdoctoral research fellowship, University of Auckland, May, 1976 (175 applicants, 2 positions)
- 3) Invited lecturer, Linguistic Institute, Honolulu, June-August 1977
- 4) Who's Who in the World (1984 and subsequently)
- 5) Invited to speak to the American Philosophical Society, Philadelphia, November, 1993
- 6) Invited to write the article, 'Austronesian Languages' for *The New Encyclopaedia Britannica*, 1995

7) Honored with a festschrift: Alexander Adelaar and Andrew Pawley, eds., 2009. Austronesian historical linguistics and culture history: a festschrift for Robert Blust. Canberra: Pacific Linguistics. 8) Elected a Fellow of the Linguistic Society of America, 2015.

9) Presented with a plaque for a Lifetime Achievement Award in Research by the University of Hawai'i Department of Linguistics, May, 2017.

# TEACHING

LING 102: 'Introduction to the study of language'. Taught regularly in the 1980s and 90s, usually using *Language Files* (Ohio State University) as a text.

LING 150C: 'Language in Hawai'i and the Pacific'. Team-taught two sections in Fall 2020, via Zoom.

LING 630: 'Field methods' (introduces students to the techniques used in doing linguistic fieldwork --- collecting data for languages that is some cases have never previously been written). Taught multiple times, but last time was around 2012.

LING. 640F, 'Sound change' (a theory course co-taught with Rory Turnbull in Spring, 2019).

LING 645, 'Introduction to the comparative method' (a foundation course on historical linguistics): taught every Fall.

LING 646: 'Advanced comparative method' (an 'issues' course that deals with issues in historical linguistics where there is significant controversy, with well-trained scholars on either side of the matter). Taught on average once every other year.

LING. 770a: 'Survey of the Austronesian language family' (an overview of the structure and history of the Austronesian languages, including the languages of Polynesia, Micronesia, much of Melanesia, Indonesia-Malaysia, the Philippines, the native languages of Taiwan, parts of mainland Southeast Asia, and Madagascar). Taught on average once every other year.

LING. 770b: 'The languages of Borneo' (a 'hands-on' course in which the students 'adopt' two languages based on data from my own field notebooks for some 41 languages of this area. This course resulted in one student co-authoring a book with me in 2014). Taught on average once every other year.

LING. 770c: 'The Philippine language family' (a survey of the languages of the Philippines in greater depth than can be done in broader courses such as LING 770a). Has been taught once in the past five years. Finding the minimum 5 students is usually the problem.

LING. 770d: 'The Oceanic languages' (a survey of the Austronesian languages of Melanesia, most of Micronesia, and Polynesia). Has been taught once, and was a great success. Future offerings will depend on student interest.

LING 770e: 'Archaeology and language in the Pacific' (an interdisciplinary course that has been co-taught twice during the past 9 years. Both offerings were highly successful, but the archaeologist who co-taught the course has now left UH, and finding others who are willing to do the same is proving hard).

LING 770f: 'The languages of Indonesia' (a survey of the languages of Indonesia in greater depth than can be done in broader courses such as LING 770a). Has been taught once, in Spring, 2019.

LING 770g: The Formosan languages (a survey of the aboriginal languages of Taiwan). Taught once, in Spring, 2020.

## ONGOING LARGE-SCALE RESEARCH PROJECTS

1. *Austronesian Comparative Dictionary* (www.trussel2.com/ACD). An ongoing project that currently prints out to nearly 9,000 single-spaced pages of reconstructions, supporting evidence and discussion. Will be a multi-volume publication when/if a paper version is published. This is the largest research project ever undertaken on Austronesian languages (between 1/5 and 1/6 of the world total). To view use the above url, or google: Robert Blust, Austronesian Comparative Dictionary.

2. Austronesian Basic Vocabulary Database (ABVD). With Russell Gray and Simon

Greenhill. Started with data from 231 languages that I supplied, but has been considerably expanded since. To view google: Austronesian Basic Vocabulary Database.

#### 2/1/2020 Blust Bio

Wrote 7 novels and 2 novelettes with American Indian themes between the ages of 11 and 15. After early aspirations to be a poet I did a B.A. in anthropology before turning to linguistics. Most of my career has been devoted to comparative Austronesian, with field data collected for 99 languages in Sarawak (1971), the Admiralty islands of Papua New Guinea (1975), and Taiwan (1994-1999), as well as work with individual speakers of Austronesian languages from other areas outside their home countries. Major publications include *The Austronesian Languages* (2009, 2<sup>nd</sup> online edition 2013), the first single-authored book to cover the entire language family, 101 problems and solutions in historical linguistics: a workbook (2018), and the ongoing Austronesian Comparative Dictionary (0), by general agreement the largest research project ever undertaken on Austronesian languages, and arguably the largest single-authored project ever done in linguistics. Other publications include over 250 articles, reviews, etc. in anthropology, archaeology, and linguistics journals, including the first scientifically plausible theory of the origin of dragons (see items 110 and 190 in the above list of publications, and 'waiting' under 'Books').
